

AmeriFoam

★ INJECTION FOAM INSULATION ★

Safe, Affordable & Efficient Insulation

With energy costs expected to rise 15 – 30% in many areas of the country, **AmeriFoam** foamed-in-place insulation will literally pay for itself by reducing your utility bills. Whether your walls are insulated or poorly insulated, **AmeriFoam** will maximize the R-Value of your walls. R-16 in standard stud wall vs. R-13 for fiberglass batting. This reduces the amount of heat or cooling that escapes through the walls. **AmeriFoam** also prevents air infiltration by sealing all wall cracks and crevices where air can enter or leave your home. All of which saves you money.

FAST AND EASY

No More Messy Cleanup

Insulation of **AmeriFoam** foamed in place insulation is a breeze in any type of block or frame construction. Typically, insulation is completed within a day. Since it can be installed from the outside, it is unintrusive... No tearing out the walls, no moving furniture or interior clean up. **AmeriFoam** insulation technicians will leave the outside neat and clean, too!

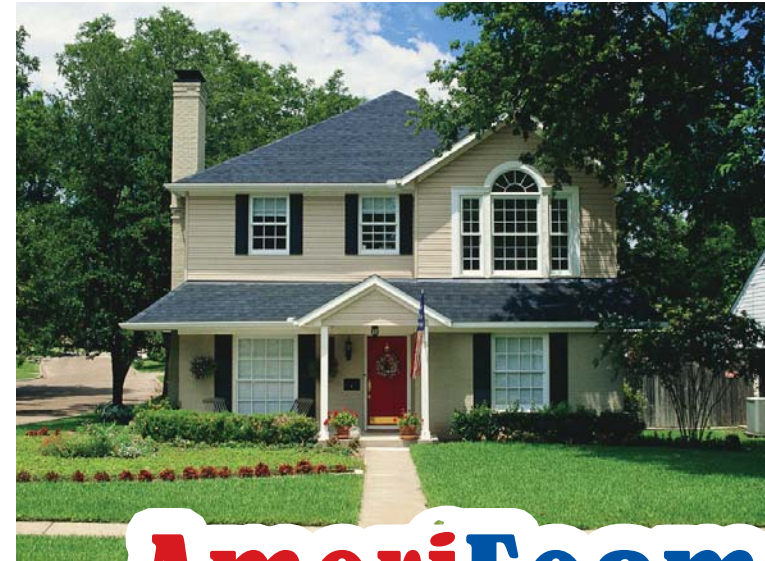

AmeriFoam MAKES YOU COMFORTABLE. **INSIDE.**

Fire Retardant & Pest Resistant

In addition to the superior insulation value of **AmeriFoam**, the product is also non-flammable (Class 1 fire rating), which adds safety and value to your home. It also helps keep critters where they belong...outside.

Always 100% effective

Unlike blow-in cellulose or fiberglass, **AmeriFoam** will not settle over time, change shape, or break down. Your **AmeriFoam** insulation stays in place, particularly at the top of the walls where it is most needed. Plus, **AmeriFoam** is not affected by moisture. If the foam gets damp, it always dries and remains 100% effective.
